

1. Write a programme that takes two numbers as input and calculates their sum, subtraction, multiplication, division, modulus and average.
2. Write a programme to swap two numbers and display the result after swapping.
3. Write a programme to display the values of two variables after swapping by bitwise operators (xor operation).
4. Write a C programme to convert a given number of days into weeks and months.
5. Write a C programme to enter the length and breadth of a rectangle and find its perimeter.
6. Write a C programme to enter the radius of a circle and find its diameter, circumference and area.
7. Write a C programme to enter a temperature in celsius to convert into fahrenheit.
8. Write a C programme to take two angles as input from the user and find the third angle.
9. Write a C programme to enter the side of an equilateral triangle and find its area.
10. Write a C programme to enter a number and print its square root.
11. Write a C programme to enter three numbers and find the largest number among them. (if-else / conditional operators)
12. Write a C programme to enter a number and check whether it is even or odd. (if-else / conditional operators)
13. Write a C programme to enter a character and check if it is an alphabet or not.
14. Write a C programme to enter an alphabet and find whether it is a vowel or consonant.
15. Write a C programme to enter an integer number and display whether it is divisible by 5 and 11 or not.

16. Write a C programme to enter the marks of a student and print the grade: (also try with switch-case).
17. Write a C programme to enter a number and find its factorial.
18. Write a C programme to enter a number and display the fibonacci series up to that number.
19. Write a C program to add and subtract two matrices of given order (rows and columns) entered by the user.

20. Write a C program to find the length of a string without using the strlen() function.
21. Write a C program to reverse a string without using the strrev() function.
22. Write a C program to check whether a given string is a palindrome or not.
23. Write a C programme to toggle the case of each character of a string.

24. Write a C program to find the **nth term** of the series: 3 4 6 9 13
25. Write a C program to find the **nth term** of the series: 1 3 7 13 21 ...
26. Write a C program to check whether a number is even or odd using a function.
27. Write a C program to compare two strings (e.g., "apple" and "apply") and print which one is greater.
28. Write a C program to calculate the area of a trapezium using a function.

29. Write a C program to check whether a number is prime or not using a function.
